

Fyrtex SB Nozzle

Fyrtex SB Nozzle is a larger version of nozzle series SK and is a reliable, basic spray drying nozzle. The yield is average compared to the other nozzle series. The SB nozzles are available in four body and adapter models, each with different design features. The nozzle consists of two tungsten carbide wear parts (core and insert). The cores and inserts are available in a variety of types and sizes. Each part is available in two different types of tungsten carbide (Y or M). The stainless steel part is made of SS 316.

This nozzle series can be used with our Superior High Pressure Atomizing Nozzle but we also supply the original body and adapter parts. All nozzle parts can be ordered separately in any quantity.
